

## EPoSS Annual Forum 2021

*Towards New Horizons*

**04. – 07.10.2021**

**Freiburg im Breisgau, Germany**

### Call for Presentations

EPoSS – The European Technology Platform on Smart Systems Integration – will hold its Annual Forum in 2021 from October 4-7 in Freiburg im Breisgau, Germany.

This year's event is organised in close collaboration with Hahn-Schickard and microTEC Südwest.

In order to present the latest developments in Smart Systems Integration (SSI), we invite you to send your abstracts for presentations and **showcase your latest Smart Systems innovations or technology developments** for Smart Systems Integration.

Presentations could include one or more of the following topic areas, which are addressing also some regional topics:

|                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>Smart Systems Integration research &amp; developments for the following applications:</b></p> <p>Next Generation of Smart Systems<br/>incl. Sensors and Actuators for:</p> <p>e.g.</p> <ul style="list-style-type: none"> <li>• Digitisation and Robotics</li> <li>• Medical Technologies and Health</li> <li>• Green and Autonomous Mobility</li> <li>• Energy Solutions</li> </ul> | <p><b>Latest developments and innovative technologies for SSI in the area of:</b></p> <p>New Innovative Technologies:</p> <p>e.g.</p> <ul style="list-style-type: none"> <li>• Smart Systems from Concept to their Recycling</li> <li>• Reliable, Sustainable and Trustworthy Smart Systems</li> <li>• Large Scale Technologies and Flexible Electronics</li> <li>• Managing Integration Challenges at Material, Technology and Process Level incl. Integrated Photonics</li> <li>• Artificial Intelligence Integration at System Level</li> <li>• Technologies for Micro-robotics</li> </ul> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Brokerage opportunities will be organised to especially network with SMEs, start-ups and young researchers.

If you wish to participate in the Call for Presentations, please submit your abstract (**1,500 – 3,000 characters**) together with your full contact details as well as a short biography to [contact@smart-systems-integration.org](mailto:contact@smart-systems-integration.org) by **July 12, 2021**.

Please use the **template** for abstract submission, which can be found under:

<https://www.smart-systems-integration.org/event/eposs-annual-forum-2021>

**Presentations will be selected by the EPoSS Annual Forum 2021 Technical Committee.**

Invitations for the authors of selected presentations will be sent out until **September 1, 2021**.
